**POWERFUL PLUM TECHNIQUE**

---

**FORMULA 1**

- AGEbeautiful Crème Lightener
- 10-volume AGEbeautiful developer (1:1 mixing ratio)

**FORMULA 2**

- AGEbeautiful 3V Permanent Haircolor
- 10-volume AGEbeautiful developer (1:1 mixing ratio)

**STEP 1**

Make a rectangular shaped section on the top of the head. Use the center of the eyebrow as a guideline for the width of your section and just below the crown for the end of your section.

**STEP 2**

Starting at the crown and working your way to the hairline, slice a very fine segment of hair across the top of the rectangle and apply Formula 1 onto foil. Then place another foil on top of AGEbeautiful Crème Lightener to keep product off of dry hair.

**STEP 3**

Next take a slice of hair, approximately  $\frac{1}{4}$  to  $\frac{1}{2}$  inch deep across the top of the foil head, and clip this hair back over to keep it out of your way. This hair will not be colored with AGEbeautiful Crème Lightener.

**STEP 4**

Continue this alternating pattern from crown area to front hair line and process until hair in foil is a red/orange color.

**STEP 5**

Then shampoo and towel dry hair to remove all excess moisture. (We recommend using AGEbeautiful hair care products).

**STEP 6**

Apply Formula 2 to hair and process for 20 minutes.

**STEP 7**

Shampoo, condition and style with the appropriate AGEbeautiful products.
